

Fact Sheet - Marketing Material

3K Global Equity Fund - Unit Class R

(Authorization: Decision 398/14.12.2021 of HCMC)

For more Info see Lexicon

Investment Policy

The investment objective of the fund is to achieve capital appreciation by investing primarily in equities of companies listed in Stock Exchanges globally.

Secondarily it may also invest in other transferable securities, money market instruments, fixed income instruments, bank deposits, and units or shares in Undertakings for Collective Investments in Transferable Securities (UCITS) and UCI, seeking to maximize their growth.

The acquisition or redemption of units is possible every (working) day following the unitholder's request, on the corresponding subscription or redemption price, as calculated in accordance with the fund's Regulation and published on the website of 3K Investment Partners (www.3kip.gr).

The mutual fund's Benchmark is the Bloomberg World Large & Mid Cap Net Return Index. The fund implements active management over the benchmark, that is, 3K Investment Partners has the discretion to manage the mutual fund and consequently the composition of its portfolio deviates from the composition of the benchmark. The mutual fund benchmark is used for comparison purposes only and for the calculation of the performance fee. The benchmark and its administrator are no longer registered in the ESMA register pursuant to Article 36 of Regulation (EU) 2016/1011, but the possibility of using the above benchmark is still possible until 31.12.2023, as shown by the public statement of ESMA 80 - 187 - 188 dated 09.03.2021 "Impact of Brexit on the BMR". Any profits occurred in Unit Class R will be reinvested.

*The investment policy was taken from the Key Investor Information Document (KIID).

Evolution of fund's NAV versus Benchmark

31/01/2025

Key Information

Fund Type	EQUITY
Currency	EUR
ISIN Code	GRF000365004
Bloomberg Code	3K3GEEI GA
Benchmark	Bloomberg World Large & Mid Cap Net Return
Managing Company	3K Investment Partners Single Member MFMC
Unit Class	R (Retail)
Launch	03/01/2022
Net Asset Value	31/01/2025
Total Net Assets (mln)	31/01/2025
Previous month's end NAV	31/12/2024

Fees

Annual Management Fee	1,50%
Annual Custodian Fee	0,12%
Subscription Fee (max)	2,00%
Redemption Fee	0,00%
Performance Fee	

20% per annum on the potential positive difference between the performance of UCITS and the performance of the benchmark. In case unit price underperforms in relation to the performance of the benchmark for one or more years, the performance fee calculation will begin only after the accumulated underperformance is previously eliminated.

Risk and Return Profile

Synthetic Risk Indicator (SRI)

The Summary Risk Index (SRI) is based on the assumption that you will keep the product for 5 years. The real risk may be significantly different if you liquidate early and you may receive less.

The Summary Risk Index is a guide to the level of risk compared to other products. It shows how likely you are to lose money because of market volatility or because we are not in able to pay you.

We have classified this product as 4 out of 7, which is the medium risk category because it invests primarily in stocks, which can fluctuate significantly.

The classification may change in the future. The lowest category (1) does not mean zero risk. This product does not include protection against future market performance, so you could lose some or all of your investment.

For more information about the risks, you can refer to the Prospectus, which is available at www.3kip.gr.

3K Global Equity Fund - Unit Class R

Lexicon

Alpha: Alpha is an extra rate of return - through means of active management - of a fund, over and above the return of the benchmark. In case of a positive alpha, the fund has performed better than the benchmark.

Annual management fee: The management fee is an annual cost expressed as a percentage. This fee will not be charged when you buy a fund. It will be withheld annually from the fund's return. It is payment for the fund's management.

Average Credit Rating: The average credit rating of the fund is based on the average credit rating of the fund constituents. In order to calculate the composite/average rating at the instrument level, Moody, Fitch and S&P ratings are used. The composite is calculated as an average based on the availability of the credit ratings. This composite rating is calculated for Fixed Income Instruments. The credit quality designations range from high ('AAA' to 'AA') to medium ('A' to 'BBB') to low ('BB', 'B', 'CCC', 'CC' to 'C').

Beta: The beta shows how the volatility of a fund is, compared to the wide market.

Benchmark: Predetermined, objective measure against which the returns of an investment fund are compared.

Duration: Measure for the interest rate sensitivity of bond prices. The longer the remaining average term of the bonds in the fund (higher duration), the more the bond prices will respond to an interest rate change. When interest rates go up, bond prices will go down and vice versa.

Fund: 'Fund' is a commonly used term for a collective investment undertaking.

Fund's Total Net Assets (Min): The assets under the management of all share-classes of a fund.

Information Ratio: Benchmark for the risk of return when assessing the performance of a fund. The higher the information ratio, the higher the achieved rate of return per unit of risk.

Morningstar rating 3-years: A (quantitative) rating calculated over a three-year period, taking into account past returns and any price fluctuations.

Morningstar rating 5-years: A (quantitative) rating calculated over a five-year period, taking into account past returns and any price fluctuations.

Morningstar rating overall: The Overall Morningstar Rating is a weighted average of the independent ratings.

Morningstar Ratings: Morningstar is an independent provider of investment research. The Morningstar rating is a quantitative evaluation of the past performance of a fund. It takes into account the risks associated with a fund and the fees that a fund charges. The rating does not take into account any qualitative elements and is calculated using a (mathematical) formula. Funds are categorised and are compared with similar funds based on their score. They are then awarded between 1 and 5 stars. In each category, the first 10% receive 5 stars, the following 22.5% receive 4 stars, the following 35% receive 3 stars, the following 22.5% receive 2 stars and the last 10% receive 1 star. The rating is calculated on a monthly basis, taking into account past performance across periods of 3, 5 and 10 years, and without taking into account future markets or performance.

Net Asset Value (NAV): The net asset value (NAV) is the price of a sub-fund. The NAV is calculated by adding up the values of all products the fund has invested in and dividing this by the number of outstanding shares.

Ongoing Charges: The total annual recurring costs for an investment fund expressed as a percentage. They usually include the management fee, administrative fees, publication costs, etc.

Performance: Shows how the value of an investment fund has increased (or decreased) over the specified period. The return takes into account ongoing costs, but no entry fees, exit fees or taxes.

Rating allocation: An individual bond's credit quality is determined by private independent rating agencies such as Standard & Poor's, Moody's and BarCap & Fitch. Their credit quality designations range from high ('AAA' to 'AA') to medium ('A' to 'BBB') to low ('BB', 'B', 'CCC', 'CC' to 'C'). Investment grade bonds (ratings 'AAA' to 'BBB') usually have a lower level of risk than bonds with ratings 'BB' to 'C' that are considered as low credit-quality bonds.

Redemption fee: This is a one-off fee that may be charged when you want to leave the investment fund.

Risk and return indicator: This is the Synthetic Risk Return Indicator (SRRI). It shows a sub-fund's statutory risk score on a scale of 1 (lower risk, typically lower return) to 7 (higher risk, typically higher return). The calculation is based on the sub-fund's volatility, so it takes into account the variation of the trading prices on the market. Volatility calculations usually cover five years.

Standard Deviation: The standard deviation tells something about the chance for a rate to fluctuate within a given range in the coming period. In case of a significant standard deviation (= high volatility), we speak about a large range of possible outcomes.

Subscription fee (max.): This is a one-off fee for buyers of an investment fund. It is usually expressed as a percentage of the capital you are investing. The provided percentage must not be exceeded in case of a maximum entry cost.

Tracking Error: The standard deviation of the difference between the monthly returns of a fund and its benchmark.

Yield to Maturity: Yield to Maturity is the return on a bond investment if it is held until the end of the term.

Yield to Worst: Yield to Worst is the measure of the lowest possible yield that can be received on a (callable) bond that fully operates within the terms of its contract without defaulting.
